

Edward Zieleniewski

Macomb, MI | (248)-252-4918 | edward.zie01@gmail.com | portfolio — github

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Go, Python, Java, SQL (PostgreSQL, MySQL), HTML/CSS
Frameworks: React, Next.js, Vue.js, Node.js, Express, Spring Boot, SvelteKit, React Native, Tailwind CSS
Cloud/DevOps: AWS (S3, EC2), GCP, Docker, Vercel, Railway, GitHub Actions (CI/CD), Serverless
Tools/DBs: PostgreSQL, MongoDB, Firebase, Supabase, Drizzle ORM, Git, Postman, REST APIs
Core Competencies: JWT Auth, Role-Based Access Control (RBAC), OAuth 2.0, State Management, CRUD Ops

WORK EXPERIENCE

Software Engineer (Contract)

Feb – Mar 2025

Metro Fluid Power

Clinton Township, MI

- Architected a **full-stack CRUD inventory management system** using React, TypeScript, and PostgreSQL, centralizing product tracking for 1,000+ SKUs.
- Optimized backend performance through **SQL query tuning**, resulting in significantly faster data retrieval and a **30% increase** in internal workflow efficiency.
- Implemented secure **Role-Based Access Control (RBAC)** and data validation layers to ensure internal security and data integrity.
- Developed advanced search and filtering modules to streamline logistics and reduce manual data entry errors.

Field Service Technician

Apr – Nov 2025

Metro Lawn Sprinkler Services

Macomb, MI

- Diagnosed and resolved 100+ critical electrical, mechanical, and sensor-based failures in high-pressure hydraulic systems using **logical troubleshooting methodologies**.
- Managed time-sensitive installation projects within cross-functional teams, maintaining a **100% on-time completion rate** for 50+ irrigation systems.
- Translated complex technical issues into actionable insights for clients, strengthening service quality and long-term customer retention.

Software Engineer

Jun – Jul 2024

University of Washington Research Group

Remote

- Engineered a custom form-templating engine that **automated research workflows**, reducing manual preparation time by over **60%** for faculty and graduate assistants.
- Developed an **inline markup editor** using React, enabling researchers to generate dynamic interview scripts without technical overhead.
- Integrated Google OAuth and architected a scalable deployment strategy for secure, zero-friction access across remote research teams.

Software Engineer (Full Stack)

Jun 2024 – Current

BroLifts (Startup)

Remote

- Developing a **Progressive Web App (PWA)** featuring JWT authentication, offline caching, and real-time data synchronization for fitness tracking.
- Architecting a **serverless microservice backend** using Cloud PostgreSQL and Node.js to handle scalable user traffic and analytics.
- Engineering secure RESTful APIs to facilitate seamless workout history management and complex user progress visualization.

PROJECTS

GorillaType | Vue.js, Spring Boot, PostgreSQL, JWT

- Launched a high-traffic competitive typing platform, scaling to **1,000+ Unique Users** through organic growth.
- Built optimized backend services with Spring Boot and SQL indexing to handle real-time analytics and global leaderboards.

PokerBot | Next.js, TypeScript, TensorFlow.js

Aug 2024

- Engineered an AI-driven poker engine using **TensorFlow.js** for on-device probability logic and fast-paced game state simulations.

Meal Macro Tracker | TypeScript, Firebase, OpenAI API

Feb 2024

- Integrated **OpenAI's LLM** to parse natural language meal descriptions into granular nutritional data points with real-time Firebase sync.

EDUCATION

Full Stack Web Development Certification

2023

App Brewery (Dr. Angela Yu)

Remote
